RE: Complaint from the Federated and Amalgamated Brotherhood of Thai Pirates and Freebooters

Please find attached a copy of a formal complaint received from the abovementioned labour organization in which serious allegations are made concerning alleged anti-labour activities and behaviour of some members of your organization.

The Ministry takes this matter most seriously and is in contact with the Australian High Embassy in Bangkok by way of a formal complaint concerning said activities and behaviour.

This letter seeks to place this matter on a formal footing in the event that it is decided at some later date to take action through the International Labour Organisation based in Geneva.

You are not required to respond to this letter, however, should you choose to do so, any information contained in your reply will be used in evidence in the almost certain international court action which will follow

Yours sincerely

RE: We been really Pissed off

We like to complain about recent disgraceful behaviour of visitor from Straya traveling on big rich boat designed to be easy pickings for us honest workin pirate.

We experience completely unacceptable reception when we try to board big boat to get punting money for Melbourne Cup lunch next day.

Guy who look like he drink too many beer call himself President something and start giving speech which make no sense but which show total lack of understanding of pirate rights and need for workin man to make a living. He very pompous and make long speech about not care who we are – he the boss and make all decisions – his decision that time is that we piss off and find someone else to provide financial assistance. Only time he show any fear is when one of friends remind him that he have to answer to guy called Makka if he give away any money. A very unpleasant person.

Not satisfied with total humiliation of FABTPF members, crew call up other guy from below deck. He really nasty piece of work. Tell us we got no idea how to organize a pirate operation and should be ashamed. He think he know everything about our line of work and come up with big list of suggestions about how we improve. This greatly humiliating as we the baddest pirates around. He then hand out big card and insist we take a ticket and pay \$10 a turn. We lose and surprised to hear a couple of his friends say that everybody always lose at that game. He call it Fine – not seem so fine to us. These two threaten to get someone called Margandawn to deal with us, so we leave in despair just in case latest person even worse than other two. Also, we none the richer.

Please to take this up with Straya Government as its not fair. These people should not be given a visa to come here and disrupt honest working man in chasing a quid. Also must be some law against pretending to be big time President when we never seen this guy on TV or in the paper. The other guy a real trouble maker and should be sent home before want to start reorganizing the government or something like that.

Yours in solidarity

Brother TTP*

Top Shop Steward

FABTPF

PS. We know where you live and where you keep 80 metre runabout.

*Tough Thai Pirate
